

Commercial Plus Acoustic Ceiling Tiles

Features & Benefits:

- **Excellent Acoustic Performance** - Commercial Plus Acoustic Ceiling Tiles are manufactured from semi-rigid fiberglass offering excellent sound absorption. Our acoustically transparent facings provide a uniform appearance without negatively impacting the product's acoustic capabilities.
- **Flammability** - Softscape Acoustic Ceiling Tiles have a Class A flammability rating in accordance with ASTM E 84. This product passes building codes that have strict flammability requirements for exposed materials.
- **Variety** - Commercial Plus Acoustic Ceiling Tiles can be ordered with optional backings to further enhance the product's acoustic performance. They are available with a white, parchment or black matte facing. Special order custom facing options are also available.

General Information:

Our high performance acoustical ceiling tiles. This tile is made from a semi-rigid 3 pound density fiberglass with an acoustically transparent matte facing. The Commercial Plus series ceiling tiles come in three models: standard, F-series with a foil backing for improved thermal and acoustic performance, and E-series with a layer of our lightweight Envirolite soundproofing material. The foil backing of the F series improves thermal performance and increases its ability to block mid to high frequency sounds. The lightweight Envirolite layer in our E series provides greatly improved sound blocking for all types of sounds. All of our Commercial Plus products are available in 1" and 2" thicknesses in 2'x2' and 2'x4' panels. They are available with a square edge profile for 15/16" suspended ceiling and drop ceiling grids. The standard facings available are white matte, parchment matte, and black matte.

Applications:

Auditoriums • Band Practice Rooms • Broadcast Studios • Call centers • Computer and Server Rooms • Entertainment Facilities • Gun Ranges • Gymnasiums • Industrial Facilities • Manufacturing facilities • Offices • Warehouses

Acoustic Data:

product series	Standard		F Series (Foil Backed)		E Series (Envirolite)	
	thickness	NRC	CAC	NRC	CAC	NRC
1 inch	.90	20	.90	25	.90	38
2 inch	1.00	23	1.15	28	1.15	41

* NRC = noise reduction coefficient
