

Soft Sound[®] Anechoic Studio Foam

Features & Benefits:

- **Engineered for performance** - The Anechoic pattern was designed to increase surface area, ultimately increasing the acoustic performance. Soft Sound[®] Anechoic Studio Foams absorb sound generated at low, mid and high frequencies.
- **Quality** - Soft Sound[®] Anechoic Studio Foams are made with flexible, professional grade acoustic polyurethane foam. The foam keeps its color better and longer than other lower quality foams. Soft Sound[™] Anechoic Studio Foams are firmer than other studio foam products on the market which adds protection against rips or tears.
- **Architectural Interest** - Soft Sound[®] Anechoic Studio Foams are available in a variety of colors and sizes. The 3D, double convoluted pattern of the Soft Sound[®] Anechoic Studio Foams creates a visually unique environment.

General Information:

Soft Sound[®] Anechoic Studio Foam is a high performance, sound absorbing foam panel designed to reduce echo within an environment. Anechoic Studio Foam enhances sound quality and aesthetics of any recording or listening environment.

Applications:

Auditoriums • Broadcast studios • Computer Rooms • Equipment Enclosures • Equipment Rooms • Gymnasiums • Gun Ranges • Home Recording Studios • Home Theaters • Industrial Facilities • Professional Theaters • Professional Recording Studios • Warehousing Facilities

Acoustic Data:

frequency	125	250	500	1K	2K	4K	NRC*
2 inch	.15	.31	.73	1.04	1.08	1.12	0.80
3 inch	.24	.46	1.08	1.05	.98	.90	0.90
4 inch	.32	.93	1.43	1.33	1.29	1.21	1.25

* NRC = noise reduction coefficient

- 24 in. x 48 in.
- 48 in. x 48 in.
- 48 in. x 96 in.
- Custom sizes available, please contact us for details.

Available Colors:

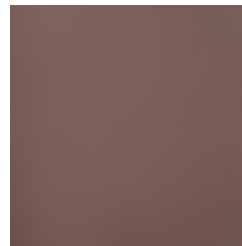

charcoal

aqua

pumpkin

chocolate

Warnings and Limitations:

All Polyurethane Foams, including Combustion Modified Foams, will burn. Do not expose to any flame source. Once ignited, they can produce rapid flame spread, intense heat, dense smoke and toxic gases causing death. Warnings should be given to your employees and or customers. Test data does not necessarily reflect a foams performance under actual fire conditions. Before purchasing any foam, be sure to check with your local code officials to confirm the required flammability rating of exposed materials for your area.
