

Softscape Acoustic Ceiling Tiles

Features & Benefits:

- **Superior Acoustic Performance** - Softscape Acoustic Ceiling Tiles are manufactured from high density rigid fiberglass offering excellent sound absorption and better sound blocking than similar products on the market. Our acoustically transparent facings provide a uniform appearance without negatively impacting the product's acoustic capabilities.
- **Flammability** - Softscape Acoustic Ceiling Tiles have a Class A flammability rating in accordance with ASTM E 84. This product passes building codes that have strict flammability requirements for exposed materials.
- **Variety** - Softscape Acoustic Ceiling Tiles can be ordered with optional backings to further enhance the product's acoustic performance. They are available with a white, parchment or black matte facing. Special order custom facing options are also available.

General Information:

Our superior performance acoustical ceiling tiles. This tile is made from a rigid 6 pound density fiberglass with an acoustically transparent matte facing. The high density improves the tiles sound blocking performance and thermal rating resulting in better room acoustics and reduced energy costs. The Softscape series ceiling tiles come in four models: standard, F-series with a foil backing for improved thermal and acoustic performance, E-series with a layer of our lightweight Envirolite soundproofing material, and B-series with an encapsulated soundproofing barrier layer. The foil backing of the F series improves thermal performance and increases its ability to block mid to high frequency sounds. The barriers in our B series and lightweight E series, combined with the higher density of our Softscape tiles, provides maximum sound blocking for all types of sounds. All of our Softscape products are available in 2'x2' and 2'x4' panels. They are available with a square edge profile for 15/16" suspended ceiling grids or a bevelled edge for either 15/16" or 9/16" suspended ceiling grids. The standard facings available are white matte, parchment matte, and black matte.

Applications:

Auditoriums • Band Practice Rooms • Broadcast Studios • Call centers • Computer and Server Rooms • Entertainment Facilities • Gun Ranges • Gymnasiums • Industrial Facilities • Manufacturing facilities • Offices • Warehouses

Product Availability:

Standard Thicknesses Availability:

- ½ in.
- 1 in.
- 2 in.

Standard Size Availability: (for all ½, 1, and 2 inch thicknesses)

- 24 in. x 24 in.
- 24 in. x 48 in.

Facing Options:

- White Matte
- Parchment Matte
- Black Matte
- Custom Designs available (special order)

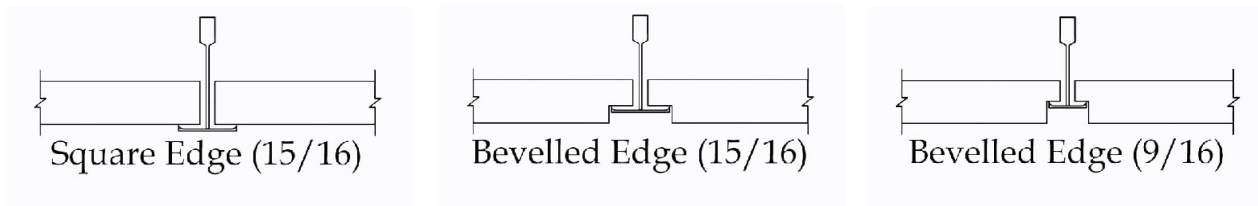

Edge Profile Availability: (for all 1, and 2 inch thicknesses)

- Square Edge for 15/16 Grid
- Bevelled Edge for 15/16 Grid (Not available for the ½")
- Bevelled Edge for 9/16 Grid (Not available for the ½")

Available Facings:
