

# Garage Door Isolation Kit

## Features & Benefits:

- **Quiets Garage Door Motors** - The Garage Door Isolation Kit significantly reduces noise caused by the vibration of typical garage door motors. This product quiets any brand of residential or commercial grade garage door openers.
- **Quality Components** - The Garage Door Isolation Kit is made with the highest quality sound isolation materials that will last the life of the door motor and beyond.
- **Not Just for Garage Door Motors** - Take the extra step to get even quieter garage doors by installing the Garage Door Isolation components to the garage door runner rails. Each kit will provide enough components to due one rail section. You will need 3 kits to do the entire garage door opening system.

## General Information:

The Garage Door Isolation Kit is designed to isolate structural noise emanating from typical garage door openers. The isolators function on the same principal as rubber motor mounts found in automobiles. Kit includes two rubber isolation mounting brackets and all the hardware necessary to install the package. This product is easy to install and all materials needed for proper installation are included. The Garage Door Isolation Kits are perfect where adjoining rooms, above or adjacent, are invaded by noise from the garage door opening or closing. This product will work with any brand of garage door openers.

## Applications:

Residential Garage Doors • Commercial Garage Doors • Any noisy garage door system

## Coverage:

Use one kit per garage door motor and one kit per garage door support rail.

## Kit Contents:

- 2 - Isolation Hangers
- 2 - Bolts
- 2 - Washers
- 2 - Locking Nuts
- 4 - 2 ½ in. Mounting Screws
- 4 - 1 in. Washers

## Warnings and Limitations:

Never install this kit without turning off the power supply. Unplug and turn off the electric breaker that supplies power to the garage door motor. This products installs to brackets with multiple hole patterns commonly used when installing garage door systems. If straight aluminum or steel L-channel was used, pre-drilling will be required to attach the isolation hangers to the l-channel.
