PRODUCT DATA SHEET

Soft Sound® Class A Corner Trap Studio Foam

Features & Benefits:

- **Engineered for performance** - Soft Sound® Class A Corner Trap is a free standing, triangular column that fits into room corners. It is a thick melamine foam product with vertical fluting. The fluted pattern was designed to trap hard to control low frequencies.
- **Quality** - Soft Sound® Class A Corner Trap Studio Foams are made with the highest quality melamine foam. The foam is consistent in density and firmness so acoustic performance will also be consistent.
- **Flammability** - Soft Sound® Class A Corner Trap Studio Foams are manufactured from melamine foam that has a Class A flammability rating. This product passes most building code flammability requirements for exposed materials.

General Information:

Soft Sound® Class A Corner Trap Studio Foam was designed to absorb low frequency sound. Soft Sound® Class A Corner Trap is a triangular column, made of high quality acoustic foam that fits into room corners. The Corner Trap design enhances sound quality and aesthetics of a recording or listening environment. Bold vertical fluting adds architectural interest. Soft Sound® Class A Corner Trap can be free standing or permanently mounted.

Applications:

Anechoic Chambers • Broadcast Studios • Product Testing Environments • Professional and Home Recording Studios • Professional and Home Theaters
