Soft Sound® Class A Studio Foam Kits

Features & Benefits:

- **Hand Picked for Performance** - We hand selected a few of our Soft Sound® Class A Studio Foam products, that when used together, create a perfect recording studio environment. Our studio foam kits contain products that will address low, mid and high frequencies making the environment acoustically tuned.
- **Flammability** - Soft Sound® Class A Studio Foam Kits are manufactured from melamine foam that has a Class A flammability rating in accordance with ASTM E 84. This product passes building codes that have strict flammability requirements for exposed materials.
- **Bang for the Buck** - After we selected the studio foam products for our Soft Sound® Class A Studio Foam Kits, we priced them to be one of the most cost effective studio foam packages on the market. You get a lot of acoustic performance for the price!

General Information:

Our Soft Sound® Class A Studio Foam Kits offer the same great acoustic performance as our other studio foam kits, however they have a Class A flammability rating. The components where hand selected by our experienced staff with three goals in mind. First, to put together studio foam package that will address the acoustically complex studio recording environment. Second, make the studio foam kits affordable for any studio recording junkie, no matter what the budget is. Third, build a studio foam kit that would pass the most strict flammability guidelines. The products in our kits are professional grade, flame resistant studio foams. These kits are perfect for those who are concerned with public safety and expect exceptional acoustic performance.

Applications:

Professional Recording Studios • Home Recording Studios • Band Practice Rooms • Home Theaters

Which Soft Sound® Studio Foam is right for me?

In general, choosing the right Soft Sound® Class A Studio Foam Kit depends on the size of the recording environment. Listed below are our Soft Sound® Class A Studio Foam Kit options. To help you select the right kit, we provide recommended room dimensions with each kit size options.

- For recording studios that are up to 10 ft x 10 ft or equal to 100 sq.ft., choose the **Small Soft Sound® Class A Studio Foam Kit**.
- For recording studios that are up to 12 ft x 12 ft or equal to 144 sq.ft., choose the **Mid-Sized Soft Sound® Class A Studio Foam Kit**.
- For recording studios that are up to 15 ft x 15 ft or equal to 225 sq.ft., choose the **Large Soft Sound® Class A Studio Foam Kit**.

For extra large spaces or recording rooms that are unique in design, give our Acoustic Consultants a call…they will be happy to help get your recording studio optimized!
