Soft Sound® Studio Foam Kits

Features & Benefits:

- **Hand Picked for Performance** - We hand selected a few of our Soft Sound® Studio Foam products, that when used together, create a perfect recording studio environment. Our studio foam kits contain products that will address low, mid and high frequencies making the environment acoustically tuned.
- **Exceptional Quality** - Soft Sound® Studio Foam Kits are made with professional grade polyurethane acoustic foam that has good color retention. Our Studio Foams are firmer than other studio foam products on the market which adds protection against rips or tears.
- **Bang for the Buck** - After we selected the studio foam products for our Soft Sound® Studio Foam Kits, we priced them to be one of the most cost effective studio foam packages on the market. You get a lot of acoustic performance for the price!

General Information:

The products within our Soft Sound® Studio Foam Kits where hand selected by our experienced staff with two goals in mind. First, to put together studio foam package that will address the acoustically complex studio recording environment. Second, make the studio foam kits affordable for any studio recording junkie, no matter what the budget is. The products in our kit are professional grade, studio foams. The products used in our Soft Sound® Studio Foam Kits where originally created for recording studio environments. All we did was take the top performers and put them together in a package. When mounted, you get the feeling you are in a professional recording studio and your recordings will top quality.

Applications:

Professional Recording Studios • Home Recording Studios • Band Practice Rooms • Home Theaters

Which Soft Sound® Studio Foam is right for me?

In general, choosing the right Soft Sound® Studio Foam Kit depends on the size of the recording environment. Listed below are our Soft Sound® Studio Foam Kit options. To help you select the right kit, we provide recommended room dimensions with each kit size option.

- For recording studios that are up to 10 ft x 10 ft or equal to 100 sq.ft., choose the **Small Soft Sound® Studio Foam Kit**.
- For recording studios that are up to 12 ft x 12 ft or equal to 144 sq.ft., choose the **Mid-Sized Soft Sound® Studio Foam Kit**.
- For recording studios that are up to 15 ft x 15 ft or equal to 225 sq.ft., choose the **Large Soft Sound® Studio Foam Kit**.

For extra large spaces or recording rooms that are unique in design, give our Acoustic Consultants a call...they will be happy to help get your recording studio optimized!

Warnings and Limitations:

All Polyurethane Foams, including Combustion Modified Foams, will burn. Do not expose to any flame source. Once ignited, they can produce rapid flame spread, intense heat, dense smoke and toxic gases causing death. Warnings should be given to your employees and or customers. Test data does not necessarily reflect a foams performance under actual fire conditions. Before purchasing any foam, be sure to check with your local code officials to confirm the required flammability rating of exposed materials for your area.
