

# Quiet Wrap LD Pipe Soundproofing Wrap

## Features & Benefits:

- **Engineered to Soundproof Pipes** - Quiet Wrap LD Pipe Soundproofing Wrap was created by our Acoustic Professionals to reduce the noise caused by waste water and drainage pipes. The barrier layer blocks sound and the acoustic foam layer dampens sound energy. The result is much quieter water pipes.
- **Ease of installation** - Quiet Wrap LD Pipe Soundproofing Wrap has a Pressure Sensitive Adhesive (PSA) for an easy “peel and place” application. Basic hand tools and a limited amount of construction “know how” is all that is needed to install this product.
- **Not Just for Water Pipes** - Quiet Wrap LD Pipe Soundproofing Wrap is also very effective at reducing noise from heating and air conditioning (HVAC) air ducts. The same principles apply whether reducing noisy water pipes or noisy ventilation ducting, block the sound and reduce vibration.

## General Information:

Quiet Wrap LD Pipe Soundproofing Wrap significantly reduces noise from PVC and cast iron pipes of any size. These soundproofing wraps for pipes include a foam composite barrier with a ½-pound sound barrier membrane. We laminate the barrier to a ¼ inch of polyurethane foam with an adhesive backing.

These pipe soundproofing wraps block noise in two ways. The first is through the isolated barrier layer, which stops noise from entering the foam layer. The second way the pipe wrap aids in reducing noise is through the adhesive backing, which reduces the vibration of the water entering the pipes and perceived noise. The Quiet Wrap LD Pipe Soundproofing Wrap is an economical choice for your pipe soundproofing needs.

## Applications:

AC Condenser Drainage Pipes • Cast Iron Waste Water Pipes • HVAC PVC Vent Stacks • HVAC Sheet Metal Ducts • PVC Vent Pipes • PVC Waste Water Pipes

## Coverage:

Pipe Diameter (in.)	Linear Coverage (ft.)
1 1/4	3
1 1/2	2 1/2
2	2
4	1 1/2

**Product Availability:**

- 3/16 in. thick x 3 in. x 96 in. roll
- Custom dimensions available upon request.

**Warnings and Limitations:**

All Polyurethane Foams, including Combustion Modified Foams, will burn. Do not expose to any flame source. Once ignited, they can produce rapid flame spread, intense heat, dense smoke and toxic gases causing death. Warnings should be given to your employees and or customers. Test data does not necessarily reflect a foams performance under actual fire conditions. Before purchasing any foam, be sure to check with your local code officials to confirm the required flammability rating of exposed materials for your area.
