

Udderly Quiet® Class A Anechoic Soundproofing Foam

Features & Benefits:

- **Engineered for performance** – The Anechoic pattern was designed to increase surface area, ultimately increasing the acoustic performance. Udderly Quiet® Class A Anechoic Soundproofing Foam absorbs sound generated at low, mid and high frequencies and have a equal to or higher Noise Reduction Coefficient (NRC) than polyurethane anechoic products.
- **Quality** - Udderly Quiet® Class A Anechoic Soundproofing Foams are made with high quality melamine foam. The foam is consistent in density and firmness so acoustic performance will also be consistent.
- **Bang for the Buck** – After we selected the foam products for our Udderly Quiet® Class A Soundproofing Foam Kits, we priced them to be one of the most cost effective foam packages on the market. You get a lot of acoustic performance for the price!
